

What You Need:

Thick paper or card stock

Instructions:

After printing the activity cards out on thick paper or card stock, fold them in half and bind the sides by stapling or gluing them. This produces a stronger card and results with an envelope opening between the two halves. This space is an ideal place to store corresponding resources and small household items such as charts, word cards, templates, or dice. Store the activity cards that you are working on together in a place where you can reach them. Have fun!
